KOOL-CEL® PADS

**KOOL-CEL® Pads are the best choice for evaporative cooling systems because:
Strongest, heaviest pad available.**

Made with the heaviest (90 lb.), highest quality virgin kraft paper

High percentage of resin content

Out-performs the competition in tests:

High tensile strength, psi

High dry crush strength, psi

High wet crush strength, psi

Produced using the most advanced curing process.

- **Cure is consistent and completely established at all contact points throughout the pad**
- **Pad Cure is designed to give the longest usable life**

Available in custom sizes and flute angles

Pads for agriculture/horticulture applications

Acme Engineering ships custom orders promptly

Advanced resin technology

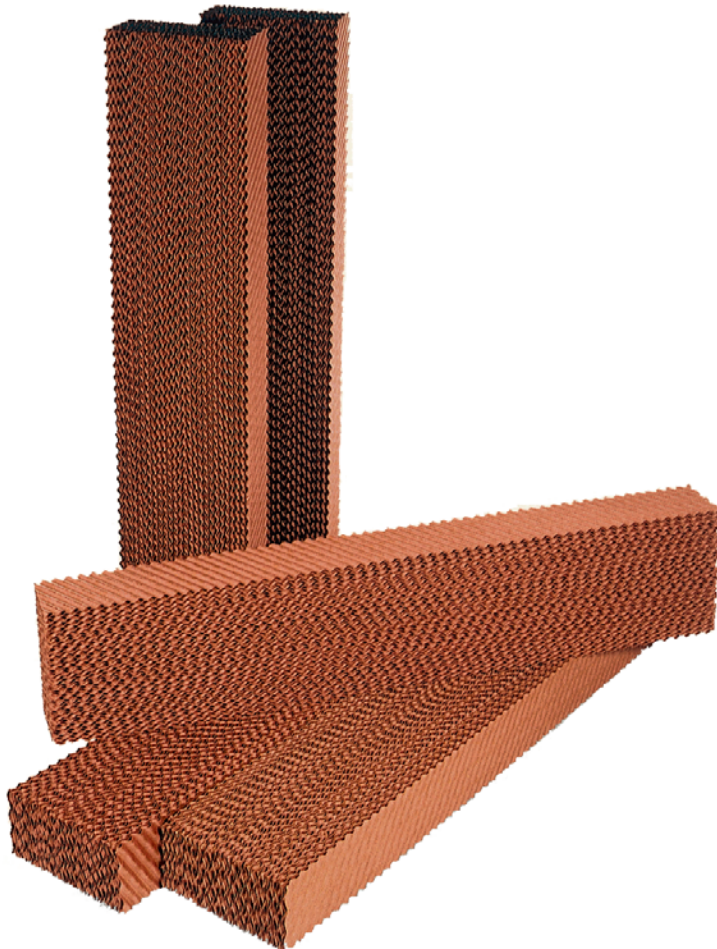

Improves strength, longevity, absorption and cooling efficiency

Edge coating available

Available with or without edge coating

Unique coral color

Distinguishes KOOL-CEL® from all others

KOOL-CEL® is a registered trademark of Acme Engineering & Manufacturing Corporation.
